## Putting your heart health in your hands

Coronary heart disease  
Arrhythmia  
Heart failure  
Cardiomyopathy  
Congenital heart defects  
Heart valve disease  
Pericarditis  
and more...

## Ask your doctor if the HeartCheck™ Handheld ECG device is right for you

The FDA-approved HeartCheck™ device is portable, easy to use, and takes accurate heart readings anytime in only 30 seconds. Storing up to 200 ECGs, data can be downloaded and printed from a computer, or emailed to a physician, clinic, or ECG co-ordinating centre.

Heart readings can be taken anytime symptoms appear, which increases the chance of an accurate diagnosis, from anywhere including at home, the office, the gym, or in remote areas which are currently inaccessible to the common ECG machines found in hospitals and clinics.
